

Nehal Tiwari

Product Manager | User-friendly AI-Native products

Product manager with experience across fintech transformation, 0→1 builds, and enterprise B2B SaaS. Looking to bring AI-native product thinking, deep UX sensibility, and structured execution to consumer financial products at scale.

WORK EXPERIENCE

Product Manager | Cubyts (2020 - Present)

AI Platform Product Manager (2023–2026) (Cubyts SDLC Platform - Early-stage B2B SaaS startup building AI-native developer tooling for engineering teams)

- Defined and shipped micro-agents to reduce engineering overhead across process management, feature drift detection, and code review within SDLC workflows using Claude
- Primary PM for **10+** enterprise clients — guided platform discovery, needs evaluation, and onboarding; advised stakeholders on optimal configurations for their workflows.
- Translated client requirements into scalable, tool-agnostic features across Jira and Azure DevOps ecosystems — eliminating the need for custom builds.
- **Key features shipped:** Code Atlas (dependency mapping) · multi-level health reporting dashboards · Process Guardian · Feature Guardian and Compliance Guardian

Founder's Office (2020–2023) (Design Ops Platform - Design Intelligence, Design Management, Design Repository)

- Shipped the product from vision doc to functioning MVP — accountable for the full product lifecycle within the founding team across research, definition, and delivery.
- Ran 100+ user interviews across the product lifecycle; used insights to iteratively shape features and push back on scope when warranted.
- Initiated and drove org-wide adoption of the ButterCookies design system — cutting UI inconsistencies and reducing workflow build time by ~40%.
- Built operational play books for Product, Design, QA, and Content — establishing a shared way of working from scratch aligned to stakeholder vision.
- **Key features shipped:** Figma-Jira sync plug-in · cross-tool design repository · automated team allocation & utilisation tracking · designer timesheets · smart project management board.

UX Lead | Fractal Ink (2016–2020)

Delivery lead on McKinsey and BCG-partnered banking transformations

Clientele: ICICI · Bank of Baroda · Axis · Aditya Birla Payments Bank · Boubyan Bank · NedBank · TrueNorth

- Led net-banking portal redesign for ICICI Bank ; as the sole UX resource, restructured 200+ pages of IA into a scalable navigation. As reported by client stakeholders, the redesign drove 100% growth in service traffic, 25% higher service conversion, and a 20% lift in customer satisfaction (Q4 FY20).
- Diagnosed a broken digital lending funnel for Boubyan Bank (Kuwait) — only 16 of 54,000+ users completed a loan application — and redesigned the journey based on data-driven intervention points, running the bank's first-ever usability research sessions.

CORE SKILLS

- AI-Powered Workflow Design & Transformation
- Agentic Product Definition & Delivery
- Cross-functional Playbook Development
- Customer-to-Requirement Translation
- Human-Centred Problem Framing

EDUCATION

- M.Des-MITID, Pune · 2014–2016
